Cannula Fixer

	<p>Elastic Bandage dressing designed to secure the catheter in challenging i.v.Application</p> <p>Properties</p> <ul style="list-style-type: none"> *U' shaped design to secure the IV cannula in place *Soft cloth fabric designed to reduce edge lift and to seal around insertion site. *Extra Strip for strong adhesion. <p>Packing Details</p> <ul style="list-style-type: none"> *In Sterile and non sterile packing *In see through peel off pouch *100pcs in convenient dispensing box
--	--

Applications
To cover and protect I.V.Canulla sites and secure devices to the skin:

Sterilised Dressing Pad

Properties
 *Built with 100% high quality medical grade cotton
 *Wrapped with highly absorbent non woven cover
 *Soft and comfortable
 *Oval, contoured shape
 *Fabric facing allows exudate (discharge) to pass into the dressing
Packing Details
 *Individually packed in a medical grade paper
 *Sterile ready to use ity
Application
 Suitable for eye injury care, and medication application

Eye-Pad

*Built with 100% high quality medical grade cotton
 *Wrapped with highly absorbent non woven cover
 Soft and comfortable
 *Oval, contoured shape
 *Fabric facing allows exudate (discharge) to pass into the dressing

Packing Details
 *Individually packed in a medical grade paper
 *Sterile ready to use it
Application
 Suitable for eye injury care, and medication application

Absorbent Lint

*Finely woven and bleached to good white
 *Raising on one side
 *Highly Soft
 *Non-Sterilized
 *Convenient for cutting in desired sizes
Packing Details
 *Packed in rolls of 500gms each
 *Any other weight as per requirement
 *60 cms. width
 *Single piece (no cutting)
Applications
 Used for medication of wound

Crepe Bandage

We offer Cotton Crepe Bandages which are useful in sprains and other minor muscle injuries. The bandages are manufactured on modern auto looms with the latest technology. The characteristic feature of this bandage is its elastic, stretchable property. This allows the bandage to be wrapped without trouble and with comfort over different body parts. The woven fast edges serve for durability and aesthetics.

Properties
 *Woven fast edges
 *Thick fabric
 *Better elasticity, controlled, uniform and smooth pressure
 *Allows normal skin breathing
 *Does not hamper muscular and joint flexibility
 *Washing in warm water restores elasticity; bandage can be reused with appropriate hygienic precautions

Sizes Available
 *15 cm x 4 m (Stretched Length)
 *10 cm x 4 m (Stretched Length)

	<p>*8 cm x 4 m (Stretched Length) *6 cm x 4 m (Stretched Length)</p> <p>Applications A crepe bandage is generally applied to provide warmth, insulation and support in a variety of medical health situations. It can be used to treat sprains and strains, to help correct fractures and other bone problems in orthopaedics.</p>

Surgical Sutures

Synthetic Absorbable Surgical Suture U.S.P.

	<p>Material Synthetic braided and coated absorbable surgical suture made of homopolymer of Glycolide Colour Violet Wound Support upto 21 days Sterilization Ethylene Oxide Standard/Certification U.S.P. ,E.p. ,CE Absorption Time 60 to 90 days Tensile Strength Retention 15% Retention on 21st day post implantation</p>
---	---

Monofilament Polydioxanone Surgical Suture E.P.

	<p>Material Synthetic monofilament absorbable surgical suture made of homopolymer of polydioxanone Colour Deep Blue Wound Support upto 60 days Sterilization Ethylene Oxide Standard/Certification E.P. , CE Absorption Time 180 to 210 days Tensile Strength Retention 50% Retention on 28th day post implantation 25% retention on 42nd day post implantation</p>
---	--

Synthetic Absorbable Surgical Suture U.S.P.

	<p>Material Synthetic braided and coated absorbable surgical suture made of homopolymer of Glycolide Colour Violet Wound Support upto 21 days Sterilization Ethylene Oxide Standard/Certification U.S.P. ,E.p. ,CE Absorption Time 60 to 90 days Tensile Strength Retention 15% Retention on 21st day post implantation</p>
--	---

Synthetic monofilament non-absorbable surgical suture made of polypropylene

	<p>Extremely high tensile strength Very Flexible Due to its synthetic and monofilament characteristic, HINSURG Polypropylene Elicits only minimal tissue reactivity. HINSURG Polypropylene is highly ductile. It extends 30% prior to rupture of the thread, allowing for the post-operative swelling of tissue and avoiding possible strangulation of tissue. Allows for secured knot tying. Extremely smooth textile, resulting in minimal tissue trauma. BRAND PROFILE: Composition: Polypropylene Structure: Monofilament Origin: Synthetic Thread colour: Blue Sterilization: Ethylene Oxide INDICATIONS: Vascular surgery Cardiac surgery</p>
---	--

	Plastic and reconstructive surgery Skin closure (intra, sub, skin) Neurosurgery Microsurgery Gastrointestinal surgery
--	---

Non-absorbable, sterile surgical suture composed of the long chain aliphatic polymers Nylon 6 and Nylon 6.6.

	<p>Easy passage through tissues due to its low frictional coefficient. Minimal tissue reactivity. Excellent elasticity. Exceptional for skin closures. High tensile strength even in the case of fine sizes for micro surgery and ophthalmology</p> <p>BRAND PROFILE: Composition: Polyamide Structure: Monofilament Origin: Synthetic Thread colour: Black Sterilization: Ethylene Oxide</p> <p>INDICATION Skin closure (intracutaneous, subcutaneous) Plastic and reconstructive surgery Microsurgery Ophthalmic surgery</p>
---	---

Silk suture

	<p>Raw silk is produced by a silkworm larva's cocoon. These natural waxes and gums are removed prior to the braiding process, allowing for a tighter, more compact braid.</p> <p>HISIL Silk suture is dyed black for easier visibility in tissue.</p> <p>HISIL Silk suture is non-absorbable and multifilament in nature.</p> <p>Although HLL classifies its silk suture as a non-absorbable suture, it loses most of its tensile strength in one year, and is completely absorbed in 2 years. Thus, HISIL Silk behaves like a very slow absorbing suture.</p> <p>HLL coats its Silk in silicon to limit absorption, increase ductility, and minimize tissue reactivity.</p> <p>The very flexible suture with a special wax coating ensures excellent handling</p> <p>A modern surface coating treatment provides the suture with an outstanding smoothness</p> <p>Minimal variations of diameter along the thread</p> <p>BRAND PROFILE:</p>
---	---

	<p>Composition: Silk Structure: Multifilament Origin: Natural Thread colour: Black Sterilization: Ethylene Oxide</p> <p>INDICATION: General closure G. I. Tract Plastic Skin Ophthalmic Cardiovascular Surgeries Widely used as ligature.</p> <p>CONTRAINDICATION: Should not be used in the biliary or urinary tracts or in cases of infection</p>

Lab & Blood Bank Disposables

Micro Centrifuge Tubes, PP

	<p>Features Major Uses: Molecular Biology & Biochemistry. Processed through Highest quality of Virgin Polypropylene. Can be used in very low temperature and with Organic Solvents. These tubes are with Integral Snap Cap. Frosting on the surface makes writing easier. Can be Autoclaved. Maximum RCF 2000. Large Mounded in graduations makes identification easy. These Tubes are RNase, DNase and Pyrogen Free.</p>
---	--

Capacity (ml)	Outer Diameter (mm)	Height (mm)	No. Per Case

Racked Centrifuge Tube Conical Bottom, EPS

These racks are designed to hold Centrifuge Conical Bottom
 These racks are made out of high quality expanded polystyrene.
 These racks designate a convenient solution for storing Centrifuge tubes.
 Placement of tubes is in zigzag format for easy dispensing.

Micro Tips, PP

	<p>Processed using High Purity Virgin Polypropylene. End Uses: Pipetting Applications, Molecular biology and precious application. Benefits: Compatible with different type of U-Pipettes, High clarity. The Orifice is precisely centered for directional accuracy. Facility: Precision Moulded Facility. Our Tips are Dnase, Rnase and Pyrogen free. Clean and the hydrophobic surface ensure low retention, increased accuracy and Reproducibility. Can be autoclaved.</p>
---	--

Capacity (µl)	Colour	No. Per Case

2 - 200	Natural	1000

100 - 1000	Blue	500
100 - 1000	Natural	500

Serological Pipettes Sterile, PS

Individually wrapped graduated pipettes with paper/plastic peel-pack.
 Unique color-Coded plug allows easy size identification.
 Sterile, individually wrapped and certified nonpyrogenic & Dnase, RNase-free.
 Lot number is printed on each pipette wrapper.
 Accuracy within +/- 2% at full volume.

Length (mm)	Capacity (ml)	No. Per Case
270	1	500
270	2	500
295	5	250
295	10	200
298	25	200
300	50	100

Cryo Vial Sterile, PP

Large white frosted portion for easy writing
 Graduation in silk screen printing makes identification easy
 Build in plug in the cap makes it leak proof
 Radiation sterilized
 Can withstand for a longer duration at ultra -low temperature

Capacity (ml)	Outer Diameter (mm)	Height (mm)	No. Per Case
1.8	11.36	45.7	1000
4.5	11.36	86.5	500

Cryo Coders, HDPE

These Coders fit onto the top of cryogenic vial closures.
 These provide quick visual identification of specific vials.
 It helps in Inventory maintenance.
 Available in wide range of colours.

Colour	No. Per Case
White	100
Blue	100
Red	100
Yellow	100
Green	100

Storage Vial, PP

Processed using high purity virgin polypropylene
 Uses: Storage of PCR reagents, enzymes & other diagnostics and biochemical reagents or samples
 Leak Proof HDPE screw closure HDPE
 Can be used from -30° C to 95° C.

Capacity (ml)	Outer Diameter (mm)	Height (mm)	No.Per Case
2.0	11.36	45.7	1000
5.0	11.36	86.5	1000

Ria Vial & Cap

	<p>Ria Vials are polypropylene/polystyrene tubes generally used in Radioimmuno Assay -a scientific method used to test antigens (for sample, hormone levels in the blood) without the need to use a bioassay. Ria Vial PP are clear and can withstand 3000 RCF during centrifugation while the transparent polystyrene tubes can withstand 1400 RCF. The PP tubes can accept common acids, alkalies & solvents at room temperature while the PS tubes can accept mild bases, weak acids but not organic solvents. Ria Vial PP are autoclavable while PS tubes are non-autoclavable.</p>

Urine/Stool Specimen Container

Urine/Stool Specimen Container is used for the Collection of Urine /Stool Sample for the laboratory examination.

Made from medical grade Translucent Polypropylene or clear polystyrene
Packing

Sterile, individually packed in Tear pouch pack.

Urine Specimen Container

Urine Specimen Container provided with easy to read graduation helps to determine the Volume.

Provided with airtight Lid for safe handling of sample
Available in 30ml and 70ml capacity.

Pack of 25. Carton of 600.

Gross weight: 9.230kg

Master Carton size: 660 x 432 x 508mm

Stool Specimen Container

Provided with airtight spoon type Lid for safe lifting & handling of sample.

Pack of 25.

Blood Lancet

Blood Lancet used as a manual blade to make a limited skin incision as for collection of Blood.

Made from medical grade Stainless Steel and polymer.
Ultrasonic cleaned.

Super sharp tip for the instant incision.

Packing

Sterile, individually packed in peel able pouch pack.

Pack of 200. Carton of 20000pcs.

Gross weight: 13.00kg

Master Carton size: 432 x 432 x 432mm

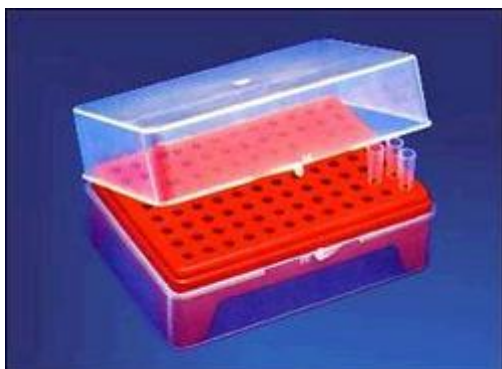

Pasteur Pipettes, LDPE

These unbreakable, non toxic all-in-one pipettes eliminate the hazard of broken glass and exposure to infectious material. Molded from translucent low-density polyethylene they are inert to biological fluids and most acids. Can be sealed and refrigerated. The low-affinity surface reduces the loss of cell & valuable proteins due to binding. Sterile and non sterile options available..

Capacity (ml)	Length (mm)	No. Per Case
1.0	150	500
1.0 (Sterile)	150	500
3.0	155	500
3.0 (Sterile)	155	500

Micro Tip Boxes

For 96 micro tips of 2-20 μ l
 For 96 micro tips of 2-200 μ l
 For 100 micro tips of 200-1000 μ l..

Blood Grouping Plates

Blood Bag Storage Cassettes

These blood bag storage cassettes facilitate group wise identification and storage of whole blood from a distance, make stacking and storage of blood easy and systematic, and thus help accidental mix-up.

These allow free air circulation of cool air within the bag also, and blood bag remains uniformly cool. These unbreakable cassettes are moulded in polypropylene and can withstand temperatures in the range of -860C to 1210C.

Available in four colours:

White
Blue
Yellow
Pink

Blood Collection Vial

Blood Collection Vials / Storage Vials / Serum Vials / Cryo Vials

As the name suggests, these vials are commonly used for storage of biological material, human and animal cells at temperature as low as -190°C . The cap is provided with built in seal ring making the vial leak-proof.

Available in the following volumes:

3 ml
6ml
10m

Sharp Container Disposal

Ergonomic handle for the more spacious models
Anti-defluxion wings that prevent the outflow of the waste
Machanism for unhooking insulin needles
Maximum filling level indicator
Various supports available
No emission of any harmful gasses during the inceneration process

Red Rubber Products

Hospital clothing and Uniforms

Lab coat

Materials: terylene fibre and conductive fibre
Distance of conductive fibre: 5mm strip 5mm grid 2.5mm grid.
Colors: white, blue, etc

Standard Surgeon Gown

	<p>It's made of SMS, SMMS, Spun lace, Spun Bond and Non Woven Fabric. The non woven gown protects micro organisms and provides high comfort of work, connected with increased breathing of the material. The gowns provide good materials as air permeable protection, comfort and convenience even during prolonged operations, water replant, alcoholic replant, liquid replant and antistatic 100% breathe.</p>
---	--

Reinforced and BVB Surgical Gowns

	<p>It is made of BVB, SMS, SMMS, Spun lace Spun bond and Non Woven Fabric. Breathable Viral Barrier (BVB) fabric is a tri laminate polypropylene based composite material with a breathable monolithic film. Provides excellent barrier properties against real world viruses causing infectious diseases such as HIV/AIDS & SARS. The front and sleeve areas of the gown are made of an exceptionally soft, yet repellent fabric. The materials are 100% breathable, anti blood, anti alcohol. So it's easy to wear for long surgery. Reinforced imperious zones on the arm & chest reinforcement offers superior strength and protection against strike through and also provides the extra level of comfort needed for extended procedures.</p>
---	--

Scrubs

	<p>Scrubs consist of 2 bags front and rubber pants paired with a comfortable unisex wear. Available in choice of material 2, TC and 65/35 cotton soil release.</p>
---	--

Patient Cloths

	<p>100% Cotton and Poly Cotton Fabric is used to make Hospital Clothes. Made from White or Dyed or Printed fabrics, the Hospital Clothes offered by us are widely appreciated by the clients, for their high quality fabric</p>
--	---

Nurse Uniforms

	<p>Nurse Uniform, these are designed to meet various requirements in the Medical Industry. In order to ensure its quality it is craft using superior fabric keeping in mind the Industry norms and safety measures. Clients can avail these nurse uniforms as per the specification at competitive prices.</p>
---	--

Hospital Towels

	<p>Towels that are available in various colors, patterns and designs. The offered towels are designed and crafted from supreme class fabric and other allied material in adherence with set industry norms. These towels have the strong kinship for water and resourcefully absorbs and removes the water from the body.</p>
---	---

Hospital Bed sheet and pillow cover

	<p>Bed Sheets are fabricated using premium quality raw material. Our range of Hospital Bed Sheets is widely appreciated for its colour patterns, fastness and variety of designs. These sheets are appreciated for having zero weaving effects and can also be manufactured in accordance to specifications provided by clients.</p>
